Skills

Front-End	JavaScript React AngularJS Node CesiumJS Vis.js HTML5 CSS3 Sass LESS Bootstrap Foundation Responsive Design
Software	Ubuntu macOS Git VS Code Sentry CircleCI Contentful

Work Experience

Front-End Developer

April 2019 - present

LifeFuels

- Built the lifefuels.com shop front-end using React, Contentful, and CircleCI; deployed to multiple environments including development, staging, and production.
- Building the entire web front-end for a tool that will allow soccer coaches and managers to manage the nutritional goals and programs of their teams using the LifeFuels bottle.
- Assign front-end tasks for internal tooling that helps maintain the LifeFuels bottle backend.

UI Developer

September 2017 - April 2019

Pragmatics

- Developed responsive interfaces to present large data sets using Cesium, React, and Vis.js.
- Integrated feedback from the team and customer in order to improve the existing product.
- Interviewed new team members and trained them in the necessary front-end web technologies.

Web Developer

October 2016 - November 2018

Freelance

- Aided a children's mental health practice with customer acquisition and website migration.
- Implemented portfolio websites and content updates.

Personal Projects

ajarana.github.io

December 2016 - present

- Custom designed and built portfolio that hosts all of my personal projects.

Education

Bachelor of Science in Chemistry

August 2012 - May 2016

College of William & Mary
