Software: Git | Grunt | npm | Linux | Illustrator | Photoshop

Languages: Spanish (native) | English (fluent) | French (proficient)

EXPERIENCE

Freelance

October 2016 - Present

- Collaborated with another developer to build a client and server-side validated contact form that allows patients to securely send personal information to a medical practice.
- Tested for and aggregated data on CSS and JavaScript bugs across multiple mobile and tablet devices using the latest versions of popular modern browsers.

PROJECTS

News Feed (1-person project)

- Built using React, Redux, and Ajax via the Fetch API.
- A feed with multiple categories that gathers its data from an external JSON API.

Canvas Memory Game (1-person project)

- Memory game where the user selects blocks of the same color in pairs to prevent them from turning red.
- Built in canvas using HTML5, vanilla JavaScript, and LESS.
- Optimized for most screen sizes, varying device pixel ratios, and popular desktop and mobile browsers.

Bootstrap Website (1-person project)

- Responsive website designed and developed using Bootstrap 3 components, LESS, and HTML5.

OTHER EXPERIENCE

Uber

September 2016 - Present

Independent Contractor
