## Work Experience

---

### Front-End Developer

*April 2019 - Present*

LifeFuels

- Currently building the dashboard front end for sports teams to manage the nutrition and hydration of players using the LifeFuels bottle.
- Built the majority of the lifefuels.com shop front end including cart, checkout, and subscription workflows.
- Help other developers solve front-end problems regarding internal and public-facing projects.

### UI Developer

*September 2017 - April 2019*

Pragmatics

- Developed the front end for web prototypes using Cesium, React, and Vis.js.
- Attended customer meetings to provide feature status updates and gather feedback.
- Interviewed new team members and trained new hires in the necessary front-end technologies to support existing projects.

### Web Developer

*October 2016 - November 2018*

Freelance

- Provided front-end web services including content updates, styling, and client-side scripts.

## Personal Projects

---

### ajarana.github.io

*December 2016 - Present*

- Custom-built and designed portfolio that hosts all of my personal projects.

## Education

---

### Bachelor of Science in Chemistry

*August 2012 - May 2016*

College of William & Mary
