SKILLS

Client-Side Development: HTML5, CSS3, JavaScript, Ajax, JSON, Bootstrap 3, LESS

Software: Adobe Illustrator, Git, Justinmind

Operating Systems: Ubuntu 14.04, Windows 10

Languages: Spanish (native), English (fluent), French (proficient)

EXPERIENCE

Freelance

October 2016 - Present

- Collaborated with another developer to build a client and server-side validated contact form that allows patients to securely send personal information to a medical practice.
- Tested for and aggregated data on CSS and JavaScript bugs across multiple mobile and tablet devices using the latest versions of popular modern browsers.

PROJECTS

Canvas Memory Game (1-person project)

- Original memory game where the user prevents blocks from turning red by selecting other blocks of the same color.
- Built in canvas using HTML5, native JavaScript, and LESS.
- Optimized for most screen sizes, varying device pixel ratios, and popular desktop and mobile browsers.

Bootstrap Website (1-person project)

- Responsive website designed and developed using Bootstrap 3 components, LESS, and HTML5.

OTHER EXPERIENCE

Uber

September 2016 - Present

Independent Contractor
