Languages	English ⏐ Spanish

Work Experience

UI Developer   *September 2017 - present*

Pragmatics

- Designing the user interface and developing new front-end functionality for an organization's internal application in order to reduce user error and improve services
- Developed responsive interfaces to present large data sets using Cesium, React, Vis.js, and other open source front-end tools
- Designed web applications, websites, and prototypes using mobile-first design principles
- Integrated feedback from the team and customer in order to improve existing products
- Helped interview new developers to determine their fit within existing company projects

Web Developer   *October 2016 - November 2018*

Freelance

- Built a secure contact form for a children's mental health practice
- Migrated a public-facing client website
- Implemented content updates

Personal Projects

ajarana.github.io   *December 2016 - present*

- Portfolio website built and designed from scratch
- Hosts my various personal projects in an effort to learn more front-end technologies

Education

Bachelor of Science in Chemistry   *August 2012 - May 2016*

College of William & Mary
