Work Experience

UI Developer   *September 2017 - present*

Pragmatics

- Developed responsive interfaces to present large data sets using Cesium, React, Vis.js, and other open source front-end tools
- Designed web applications, websites, and prototypes using mobile-first design principles
- Coordinated with backend developers and architects in order to build functional applications
- Integrated feedback from the team and customer in order to improve the existing product
- Interviewed new team members and trained them in the necessary front-end web technologies

Web Developer   *October 2016 - present*

Freelance

- Built a secure contact form for a children's mental health practice
- Successfully migrated a public-facing client website
- Continuously perform content updates

Personal Projects

ajarana.github.io   *December 2016 - present*

- Portfolio website built and designed from scratch
- Hosts my personal projects including a news feed, memory game, and bootstrap website

Education

Bachelor of Science in Chemistry   *August 2012 - May 2016*

College of William & Mary
