Skills

Front End	JavaScript ⏐ CSS3 ⏐ HTML5 ⏐ React ⏐ TypeScript ⏐ Angular ⏐ Sass ⏐ Responsive Design ⏐ Bootstrap ⏐ Node ⏐ Kendo UI ⏐ Jasmine ⏐ CesiumJS
Software Tools	macOS ⏐ Ubuntu ⏐ Git ⏐ VS Code ⏐ Jira ⏐ Sentry ⏐ CircleCI
Languages	English ⏐ Spanish

Work Experience

Senior Front-End Developer   *January 2021 - Present*

Ace Info Solutions (acquired by Guidehouse in October, 2021)

- Using Angular and Kendo UI to develop and update the core features of a user management application.
- Coordinating with a UI/UX team in order to bring consistency and extensibility to common components shared across different projects.
- Developed the front end for a minimally viable product using React and TypeScript.

Front-End Developer   *April 2019 - December 2020*

LifeFuels

- Coordinated the back-end and design changes necessary for front-end feature implementation with a small remote team.
- Built a dashboard using React for sports teams to manage the nutrition and hydration of players using the LifeFuels bottle.
- Built the first version of the lifefuels.com shop front end including cart, checkout, and subscription workflows using React.

UI Developer   *September 2017 - April 2019*

Pragmatics

- Visualized real-time geospatial and weather data for a federal client using CesiumJS.
- Made incremental improvements to the design and front-end stack of an existing web-based dashboard.

Education

Bachelor of Science in Chemistry   *August 2012 - May 2016*

College of William & Mary
