Software
Git | Grunt | npm | Linux | GIMP | Illustrator | Photoshop

Languages
Spanish (native) | English (fluent) | French (proficient)

EXPERIENCE

Freelance   *October 2016 - Present*
- Collaborated with another developer to design and develop a client and server-side validated contact form for new patients.
- Tested for CSS3 and JavaScript bugs across multiple devices and the latest versions of suitable browsers.
- Developed a responsive portfolio with semantic HTML5 as well as CSS3 and jQuery animations.
- Perform website maintenance including content and layout updates.

PROJECTS

News Feed (1-person project)
- A current tech, gaming, and science news feed.
- Built using React, Redux, and Ajax via the Fetch API.
- Gathers data from an external JSON API.

Canvas Memory Game (1-person project)
- Memory game where the user has to select blocks of the same color in pairs.
- Built in canvas using HTML5, vanilla JavaScript, and LESS.
- Device and browser agnostic.

Bootstrap Website (1-person project)
- Responsive website designed and developed using Bootstrap 3, LESS, and HTML5.
- UX considerations include clear legibility for white text and icons against background images.
